

Critical Priority

Medium Priority

Global Priority

Mycobacterium tuberculosis

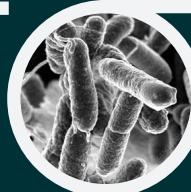

MDR-TB: multidrug-resistant tuberculosis, does not respond to at least isoniazid and rifampicin

XDR-TB: extensively drug-resistant tuberculosis, MDR-TB plus fluoroquinolones and injectable second-line anti-TB medication

Acinetobacter baumannii

carbapenem-resistant

Pseudomonas aeruginosa

carbapenem-resistant

Enterobacteriaceae

carbapenem-resistant
3rd gen. cephalosporin-resistant

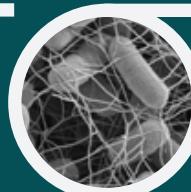

Enterococcus faecium

vancomycin-resistant

Helicobacter pylori

clarithromycin-resistant

Salmonella species

fluoroquinolone-resistant

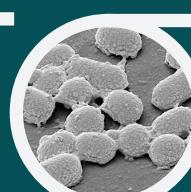

Staphylococcus aureus

vancomycin-resistant
methicillin-resistant

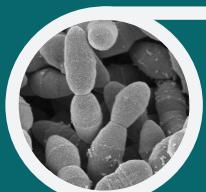

Campylobacter species

carbapenem-resistant

Neisseria gonorrhoeae

fluoroquinolone-resistant
3rd gen. cephalosporin-resistant

Streptococcus pneumoniae

penicillin-non-susceptible

Haemophilus influenzae

ampicillin-resistant

Shigella species

fluoroquinolone-resistant
